

WeldTec®

Quick Chucks™

The new Quick Chuck™ makes changing or adjusting TIG tungsten electrodes a snap.

- Simple, quick and easy
- No more stripped torch body threads
- No more searching for collets or collet bodies
- Color coded chuck sizes

Weldtec's clever Quick Chuck™ allows simple and quick electrode changing or adjusting. Simply push in the rear rubber knob with your thumb and the electrode is free to be removed or adjusted. Once the electrode is removed, the chuck easily pulls out of the torch body and a different size chuck and electrode can be inserted into the same chuck body.

These Quick Chuck™ are used in place of the standard collet and collet body on most TIG torches and are available in the popular sizes of 1/16", 3/32", 1/8" or in convenient kits.

The Quick Chuck Kits

QCK-920 includes: 1 each, chuck body (13NQCB), 1/16 (13N22QC), 3/32 (13N23QC), 1/8 (13N24QC) chucks.

QCK-1718 includes: 1 each, chuck body (10NQCB), 1/16 (10N23QC), 3/32 (10N24QC), 1/8 (10N25QC) chucks.

ORDERING INFORMATION

TORCH SERIES	CHUCK BODY	QUICK CHUCK			LENGTH*
9, 9F, 9FV, 9V 20, 20F, 20H, 20V SW-320	(For all chucks) 13NQCB	1/16" Orange 13N22QC	3/32" Black 13N23QC	1/8" Gray 13N24QC	2-5/8"
17, 17F, 17FV, 17V 18, 18V 26, 26F, 26FV, 26V SW-418	10NQCB	10N23QC	10N24QC	10N25QC	3-7/8"

*Maximum electrode length with 3/16" electrode stick out.
